Art Unit 1713

The rejection as set forth in the parent case, Serial No. 09/202,950 is herein withdrawn. This is in view of applicants' amendments and the remarks filed on May 21, 2001.

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ 2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 15-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of U.S. Patent No. 6,403,708. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instantly claimed particulars are claimed in the patent in that while the scope of the inventions claimed therein is slightly different, the claims in this application are considered prima facie obvious from those set forth in the patent.

Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 15-42 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Moriya et al., U.S. Patent 6,403,708.

This patent shows crystalline polypropylene containing compositions. The crystalline polypropylene can have the molecular weight ratio values falling within the instantly claimed invention. The additional resin and filler material are shown throughout columns 24 and 25. The fillers as instantly claimed are disclosed at column 32 lines 3+. The Examiner maintains that each of applicants' ingredients is suggested within this patent and It would be prima facie obvious to one of ordinary skill in the art to formulate the composition as claimed.
